PRIVATE WHEN POWERED OFF

Easy to install

EB SMART FILM (EBSF)

#ABOUT EBSF

EBSF also called switchable film, that is capable of adjusting light transmission between transparent and opaque using AC power. EBSF is private and opaque when powered off and transparent clear when powered on.

EBSF Is applied for making smart glass by lamination on glass, and be directly installed on any existing smooth glass surface. It combines many functions, such as light adjustment, UV and infrared blocking, advertising and security.

2 installation types for EBSF: Self-adhesive and non-adhesive.

Self-adhesive EBSF is easily installed with self-adhesive backing, Just a simple peel and stick. Non-adhesive EBSF is installed using clear both side tapes.

We provide custom manufactured to your project, electrical control system, 7 colors, and professional consultant for your project.

Just press a button you'll get a instant privacy or clear view with EBSF.

EBSF can also be applied as projection screen, white board, and dimmable window.
